

Summary Information on Bebor Model Nursery/Primary School Donors

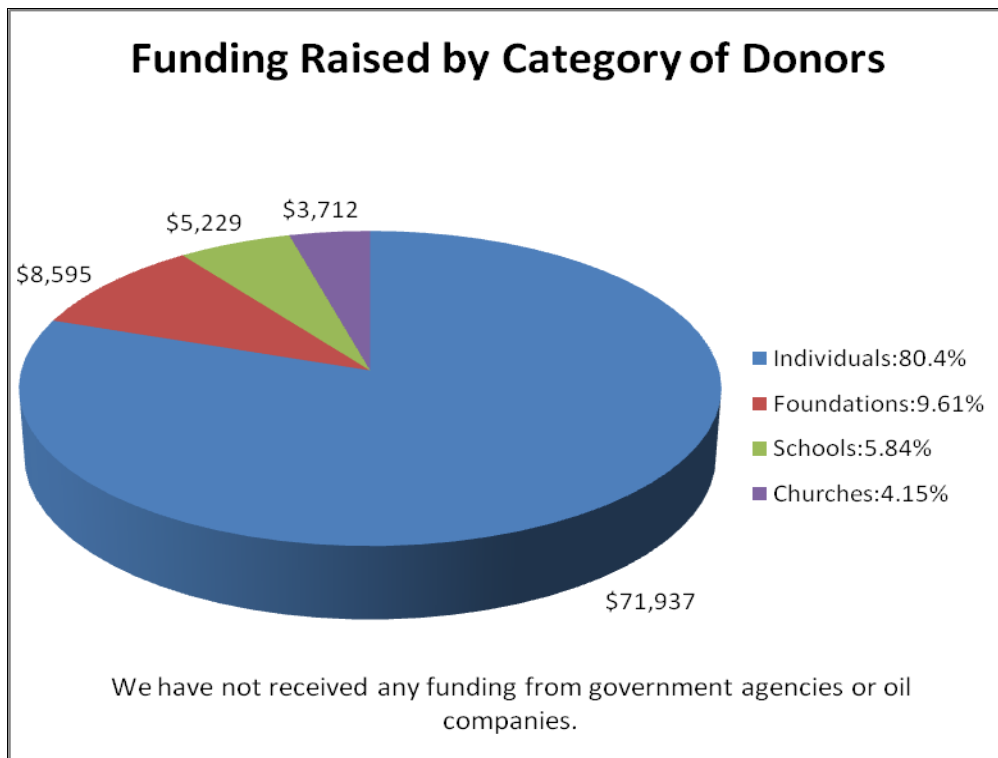

NOTES: This summary covers the first eight years of funding for this project from October 2000 – October 2008. At the time this summary was compiled, \$89,473 of funding for the schools had been raised in total.

There are a number of caveats or qualifications to this data. The number of donors is certainly understated as a number of church and school groups are entered as one donor when dozens of people might have contributed to what we record as a single church or school donation. Our single category “anonymous” also represents more than one donor but is just counted as one in this summary. All donations have been rounded up or down to the nearest dollar. Some individuals have donated to the project through their own charitable foundations. They are counted as individuals here and not as foundations. Finally, these figures will obviously change as additional donations arrive over the coming years. Given the extensive eight year time frame, though, the broad patterns should not change quickly.

SUMMARY INFORMATION:

Of our 10 largest donors, seven of them are individuals, one is a foundation, one is a school and one is a church.

As of October 31, 2008, our single largest donor had contributed \$6,600 to this project. Our 10th largest donor had contributed \$2,250 to this project.

As of 10/31/08, we had received donations from at least 200 different individuals or groups.
